## ArbiterSports Assigning System

ArbiterSports pioneered the use of sports official assigning software in 1984 and has been the industry leader ever since. The ArbiterSports Assigning System provides online access to real-time game information for assigners, officials, leagues and teams.

Associations ranging from 10 to 5000 officials currently use the ArbiterSports Assigning System to schedule over 275,000 total officials to more than 3 million games annually.

Because the ArbiterSports Assigning System allows associations to share officials, and for officials to see their assignments from all of their groups in one place, the benefits of joining ArbiterSports grow with each new client.

Some of the most popular features include:

- comprehensive roster management
- officials' profiles and pictures
- automatic email reminders
- maps to game sites
- game change notifications
- ability to use Manual-Assign, Auto-Assign, and Self-Assign
- a single login permitting officials to manage their assignments and availability for all of their assigners from one website
- a payroll module with game fee tracking, check writing, 1099's, and integration with ArbiterSports RefPay online payments
- communications tools to email all group officials, to send game reminders, notices and announcements
- powerful travel reimbursement calculations
- and much, much more

The ArbiterSports Assigning System is the easy and affordable way to take an association to the

next level. For additional information or to schedule a demonstration or free trial account, please contact our sales team at 800-576-2799, or [sales@arbitersports.com](mailto:sales@arbitersports.com)
